DETAILED ACTION

Allowable Subject Matter

1. Claims 1-5, 18-22, and 28-32 have been allowed.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance:

The prior art of record issued to Haugli and Dent either alone or combine fails to teach or suggest an apparatus and its corresponding method for generating, at a downconverter, a first signal having a first frequency with a first frequency oscillator, generating a second signal having a second frequency with a second frequency oscillator, and the first and second frequencies being different from each other and from a frequency of an incoming RF signal; then generating **at least one local oscillator signal having a frequency determined as a function of the first and second frequencies**, and **generating at least one baseband signal as a function of the local oscillator signal and the RF signal** as cited in claims 1, 18 and 28.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Suominen and Haartsen (PTO-892 attached) disclose systems related to downconverter and technique of generating baseband signal with different approaches.
